EXTENSION OF PUBLIC COMMENT PERIOD

On June 12, 2006, EPA proposed new source standards of performance for stationary spark ignition internal combustion engines. EPA also proposed national emission standards for hazardous air pollutants for stationary reciprocating internal combustion engines that either are located at area sources of hazardous air pollutant emissions or that have a site rating of less than or equal to 500 brake horsepower and are located at major sources of hazardous air pollutant emissions. In this notice, EPA is announcing a 30-day extension of the public comment period.

PROPOSED RULE

On October 12, 2005, EPA promulgated national emission standards for hazardous air pollutants (NESHAP) for new and existing hazardous waste combustors. Subsequently, the Administrator received four petitions for reconsideration of the final rule. In this proposed rule, EPA is granting reconsideration and requesting comment on several issues raised in the petitions of the Cement Kiln Recycling coalition, the Coalition for Responsible Waste Incineration, and the Sierra Club. In addition, EPA is proposing several amendments and corrections to the final rule to clarify some compliance and monitoring issues raised by several entities affected by the final rule.

PROPOSED RULE

EPA is proposing national emission standards for hazardous air pollutants (NESHAP) for four area source categories. The proposed NESHAP reflect EPA's determination that existing facilities in three of these categories are well controlled and that the emission control devices and work practices at these facilities represent the generally available control technology (GACT) for these source categories. For secondary copper smelting, EPA is proposing NESHAP for new area sources because there is not, and never will be, any existing source in this category.
